<small>Manufacturer stipulates that these ratings conform to applicable NFRC procedures for determining whole product performance. NFRC ratings are determined for a fixed set of environmental conditions and a specific product size. NFRC does not recommend any product and does not warrant the suitability of any product for any specific use. Consult manufacturer's literature for other product performance information. www.NFRC.org</small>		

**To qualify.**  
 To qualify for LG&E and KU rebates, the high-efficiency replacement window must have a solar heat gain coefficient that is less than or equal to 0.45 or a shading coefficient that is less than or equal to 0.50.

NFRC stands for National Fenestration Rating Council, a national standard institute that accredits window products. When your new windows are installed at your home, you should have been provided a label or certificate from NFRC that includes the model numbers and solar heat gain coefficient. To qualify for our rebates, this coefficient must be less than or equal to 0.45.
